Im thinking lots of happy thoughts and having such a great and amazing day the sun is shining and their are too many fun thing to do. I really really love the summer because its my favorite time of year. I know that a lot of people think that the summer is to hot but i dont really agree with that because its so much fun you forget your even hot! plus you can always go to the beach or the pool to cool off. I really also like the water too and when i was younger i would go out with my friends and family to play in the water. Im hoping i can go somewhere fun next summer like hawaii or Jamaica so that i can fully enjoy the beach and the water, and the sun and the outdoors and the heat. Those things make me happy. I wish that summer was around all year so that i could always be happy because i don't like the fall or the winter. I actually hate the winter. Its way to cold. Spring is okay though. Its pretty but its not the same as the summer. I'm going to enjoy my summer and dream that it last forever.
